

## GCX Fleet Assessments

Prevent downtime, budget with confidence, and maximize ROI—with a no-cost, no-nonsense assessment of your mobile and wall arm workstations.

**Focused inspection.** Workstations in the ER wear differently than workstations in L&D. GCX experts know exactly which condition issues to look for across every department in your hospital.

**No disruption.** To save time and minimize inconvenience, we inspect a statistically significant sample\* of your workstations. And we schedule inspections when workstations are offline or in limited use.

**Actionable information.** You'll receive a detailed report on the physical and mechanical condition of your carts and wall arms, as well as power system evaluations and battery life projections for your powered carts.

**Value-based recommendations.** GCX will recommend cost-effective actions—from no action at all for in-condition workstations, to adjustments, recalibrations, part replacements, strategic upgrades or product replacements if needed.

# Covered products
